Tennessee must become a new Watterson of the Courier Journal State, A new roof tree must be says Sam Randall is a small man, planted. We must live more and but notwithstanding he gives a faster in the next ten years than large amount of space to this small in the last thirty. The Northern stolen and then cry thief. personage; the two things do not papers are full of Tennessee and her run parallel. If Randall is so very resources. We must do our duty small, Watterson who is such a and open our doors to every new Our Opportunity and Interenteprise, and the best way to do this is to commence at the fountain head. In other words we must move out of the old into the new.

Journalism of To-Day.

During the last decade, or at least during the last twenty-five years, the journals of this country have undergone a complete revolution. The progress of the press has kept sbreast of with the great revolutions

lis. If this young gent had been a country paper should produce edicivil service officer we wouldn't torials as long as the moral law has wonder at his theft just before the become extinct. Our columns congreat Democratic side show, but we tain four times as much as formally, can't imagine why a cadet, where long metaphysical discussions are every want is met, should break the left to periodicals making aspecialty of technical subjects, Correspondents are also catching the idea

that brevity is the soul of wit. The press of to-day comes nearer meeting the demands of the people than ever before. Newspaper men are preparing their articles so that those who run may read. In this busy bustling world of activity many only have an opportunity to

of life. So let the good work go on to come.

Maryville, Tenn.

Its Santtary Condition-A Time ly Topic Ably Discussed by Dr. Blankinskip.

Dr. John P. Blankinship, of Maryville, Blount County, Tenn., writes Dr. J. Berrien Lindsley, Secretary of the State Board of Health, and adjoining counties. It is a to the following effect, in a letter "I would say in relation to the

ty contains some valuable metals, and the time is not far distant when these deposits will be sought after.

The community that improves the opportunity of directing the attention of the public to these orcs will be the ones that profits most largely thereby.

As an inducement to help start

"I would say in relation to the condition of Maryville, that it is not as good as King Solomon's was when in all his glory, yet there may be towns in this State that are not in as good condition so far as the health of the people is concerned. It is geographically located as well as any town in the State, with a population of about 2,000. What seems to be needed now in all the smaller towns of the State is authority by law to cause the necessary ity by law to cause the necessary work to be done. We have a dis-not yet taken any action looking to the sanitary condition of the town locality from which they are in order to be ready to these recipes and use them. Squirbrought noted. Already some fine meet an invasion of the cholera rel, muskrat, opossum, coon, cat, specimens of iron and lead have should it come next summer, and I bear, deer and fox skins can thus

again by the disease. Now our Commissioners are ready and wil- valuable. ling to do anything in conformity with the laws of the State in a sanitary sense. There seems to be a want of Boards or Aldermen and Commissioners of Taxing Districts going to citizens and saying to them that a certain work must be done in every city, town and village in to throw Randall, of Pennsylvania, the State in the next seventy days.

My idea is that each board that includes Mayor and Alderman, Com- heading the movement. The Demand it stands Blount County in hand to reap her share of the bone-fits. We have printed, from time to time, articles that have been handed in upon this subject, and we would call special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in this week's paper, written by one thoroughly posted special attention to the article in the beautiful attention to the article in the article in the article in the beautiful attention to the article in the article in the article in the article in upon the mineral deposits of Blount County.

In a succession of Blount County.

Coun not do the work or pay forit. Each town must have a head that will nave the necessary work done at once. This work is of more importance to the people of the State than anything they could engage in at this time, for past experience has demonstrated that a strict sanitary condition, of our homes in citatry condition, of our homes in citatry conditions in the only safety or ies and towns is the only safety or checkmate we have so far as cholers and yellow fever are concerned. There is more to be done in pre-

the cholera to spend its fary. It is our little city that some action he taken at once. We must not sleep ualists, and told them that a spirit had and become insen lble to the laws of decency and cleanliness. We must not wait until the horse is

ests.

Now that the election is over and Now that the election is over and the result cannot be changed, it behooves every Tennesseean to think and talk less about politics, but do what he can to build up his town, his city, his section and his State. While we firmly believe that the continuation of the Republican party in power would have been much better for Tennessee and for all the Southern States, yet with even the Democratic party in poweven the Democratic party in power we believe Tennessee can be made one of the most desirable The old theory that every States to live in and one of the most prosperous States in the Union. Our natural advantages are great and in some respects are unsurpassed. Our climate is temperate—we do not have the cold of the North or the heat of the South.

But we will not enumerate our great. The necessary capital was forthcoming at once, and James commenced operations. He put down a well on the spot where he said the spirit had led him into the cavern and at the depth of 830. Union. Our natural advantages But we will not enumerate our great natural advantages as we wish to sand and a 150-barrel well was the re-call attention to only one important sult. A well of that size was an unusfact. In Tennessee, and especially in East Tennessee, a man can vote as he pleases, can express freely any political opinions he may have without fear of ostracism or injury in body or estate. Beyond question the success of the Democratic par-ty at the recent election will for a few years at least stop the flow of emigration and capital from the Northern to the Southern States. read fifteen or twenty minutes in the day, and it becomes necessary for journalists to condense their the North, and it was also assured that all who might come would be The United States Senate passed a bill making the 4th day of March a National Holiday. That is a boom for inauguration day. All holidays ought to be anti-drinking days. Let Tennessee fall into line in this direction by passing a law recognizing the day as such, and disallowing any saloon to keep open or sell ir oxicating liquors on that day.

To Tan Skins with Fur On.

Take two parts, each, of alum and salt, and one of saltpetre; pulverize all. Cleanse the skin from fleshy matter, then make it white with the mixture; fold in edges and roll up. So let it be for four days, then wash with soap and water and rub till dry and soft.

Another way is to scrape off all the fleshy matter, then wash with soft water, after which take a glass

may tan skins of animals with the PEANUTS perbushel 85 is very nice and quite good for inelothing, as well as for ornamental work. It is worth while to save am afraid we will be scourged be dressed and tanned and become

Overboard.

The Democrats of the Lower House of Congress are threatening to throw Randall, of Pennsylvania,

Quadrennial Sessions.

The present Congress shows builtile disposition to work. It would be better for the country if this body did not meet oftener than once in four years. Quadrennial sessions would be a great saving to this country, and continue in selon tweive months. Let this body meet each inauguration day of a new President.

ABRAHAM JAMES STRANGE STORY.

Abraham James, whose singular dis

ualists, and told them that a spirit had revealed to him the existence of a vast deposit of petraleum in a locality where no one had as yet thought of searching for it. He said that he had been stopped in the road by the spirit, who took him from his wagon and conducted him like magic across fields and through forests to a wild spot in the vicinity of Pleasant-ville, where they rested. Presently the earth opened and an immense cavern yawned before them. Into this James was led by the spirit. They journeyed down into the earth a long distance, down into the spirit. They journeyed down into the earth a long distance, and, finally, James was brought to the margin of a lake of petroleum of unknown extent. Speechless with amazement, James gazed on this apparently boundless store of wealth a few minutes, when the spirit led him back to the surface of the earth.

face of the earth. The cavern closed and the spirit vanished. James assured the men to whom he confided this marvelous intelligence that the great deposit had been revealed to him by the spirit in order that the faithful might benefit by the knowledge. He solicted them to lose no time in furnishing, the means to develop the new territory thus placed within their reach. feet the drill struck a rich oil-bearing ual one then, and the strike set the entire oil country wild. In a short time Pleasantville was surrounded with wells, which were producing more oil than all the old districts, and the new territory was the greatest oil-field in the world. The James combination put down five wells on their tract, every one of which was a big producer. Oil was then selling for more than \$3 a barrel, and, although the life of this new field was comparatively short, the operators all

James left the oil country after this Pleasantville field became exhausted worth \$500,000. He never came east, and it is said he lost the most of his test his theory.
